

SPEED BLASTER™

GRAVITY FEED MEDIA BLASTER

The Fast, Easy
Media Blaster

2 Year
Limited
Warranty

Rust, scale and corrosion are tough to fully remove. Blasting high-speed media particles at the work piece is the best way to get into all the small niches in the metal to ensure complete removal. Speed Blaster's™ gravity fed, safety vented reservoir tank eliminates tubes or siphon hoses that can easily clog. Speed Blaster runs continuously and virtually clog free with the correct media and moisture-free air. And you can use a variety of blast media that do not exceed 14 grit.

The lightweight, long-lasting, comfortable design employs gravity to help force the media into a hardened steel mixing chamber. Compressed air then forces the particles through a top grade alumina ceramic nozzle at extraordinary velocity.

Speed Blaster is self-contained and small for easy storage in a toolbox drawer. The next time you need to blast something, just connect compressed air and go.

SPECIFICATIONS

Operating Pressure	60 -100 PSI
Working Pressure	70 -100 PSI
Air Consumption	10 CFM - 100 PSI
Min. Air Compressor	3 HP
Fitting Size	1/4 NPT
Container Capacity	26 Oz. (Vol.)
Gun Material	ABS
Empty Weight	14 Oz.
Max. Particle Size	14 Grit
Colors Available	Red, White, Blue

"I just wanted to tell you how good your Speed Blaster gun is. I do metal texturing for a company on their dies. It's so easy to use. The lightweight and ergo-balance of the gun make it fun to use. I really recommend it for any small to medium size job. Thanks for making work fun again."

HOT SPOT™

Convert your Speed Blaster™ into a spot blaster in seconds, without tools, with the **Hot Spot HS2020 Spot Blast Recovery System**. HS2020 turns your Speed Blaster into a self-contained spot blast system capable of virtually eliminating blast overspray. Simply attach one of the four blast cones provided, push the Hot Spot over the Speed Blaster's ceramic nozzle and go. The individual shapes of the four blast cones conform to any surface. Hold the HS2020 blast cone tightly to the work piece and pull the trigger. The blast media, rust, scale and debris are instantly directed into the breathable collection bag.

Used correctly, the system will virtually eliminate debris and dust, which reduces cover-up and clean-up time. When the collection bag is full, simply remove the blast cone and shake contents out. It's that easy.

QuickSpiff™

AIR POWERED VACUUM

Quick Spiff™ makes cleaning up almost fun. It's so quick and easy, it's like having your own personal tornado pick up whatever mess you make.

Quick Spiff is completely self-contained: no tubes, no tanks, no trouble. Just connect an air line and pick up dirt, dust, nuts, bolts or whatever. You'll be amazed at the pulling power this unit develops.

Quick Spiff includes assorted attachments to get into a range of places and hard-to-reach spots and its heavy duty dust collector bag empties in seconds. When time means money, Quick Spiff gives you more.

Features

- Comfortable, one-piece pistol grip handle
- Heavy duty, easy-empty dust bag
- Rear deflector extends bag life
